SUMMARY

Data operations professional with a background in computer science, software development, and quality assurance. Experience owning recurring reporting and supporting Salesforce-based system migrations, data validation, audience segmentation, and workflow integration. Skilled at turning unclear business requests and legacy-system constraints into reliable outputs, documented rules, and maintainable processes

EXPERIENCE

SEMA (Speciality Equipment Market Association)

Diamond Bar, CA

DATA OPERATIONS COORDINATOR

2025 – Present

- Support the annual SEMA Show and year-round operations through reporting, data quality, audience segmentation, and ad-hoc support across sales, marketing, operations, and leadership
- Helped transition reporting from a legacy association-management system to Salesforce by validating migrated data, rebuilding reports, and identifying duplicate/invalid records
- Reconstructed first-time event-exhibitor history dating to 1965 by reconciling conflicting system and spreadsheet records
- Built a Power Query integration that translated Salesforce-based event data into a legacy Microsoft Access workflow, preserving business-critical booth-selection process during the system transition

Knights Of Creation

California

FULL-STACK DEVELOPER

2023 – 2025

- Built SQL and Python tools, ETL workflows, internal automation, data-transfer processes, and user-facing applications supporting structured operational workflows
- Designed supporting data logic and interfaces that made processes more repeatable, usable, and easier to maintain

Maxgames Studios

Remote

QUALITY ASSURANCE & LIVE OPERATIONS

2017 – 2022

- Transitioned into paid development support after beginning as a volunteer contributor, earning increased access and responsibility through consistent work
- Tested live-service updates before public beta release, performed regression testing, reproduced defects, validated workflows and data, and documented findings for developers

VOLUNTEER QA CONTRIBUTOR

2015 – 2017

- Tested game systems, reproduced technical issues, validated data consistency, and documented defects with clear reproduction steps
 - Earned additional responsibility through dependable testing, communication, and follow-through
-

TECHNICAL SKILLS

- **Data:** SQL, Data Validation, Data Cleansing, ETL Processes, Audience Segmentation
 - **Reporting & Analytics:** Excel, Power Query, Power BI, Google Looker Studio, Google Analytics
 - **Business Systems:** Salesforce, Microsoft Access, iPost Enterprise
 - **Automation:** Python, VBA, APIs, Git
-

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science

Honors: Cum Laude

Grand Canyon University

Phoenix, AZ

Certified ScrumMaster (CSM)

Scrum Alliance Inc.
