SUMMARY

Data and operations analyst with experience using SQL, Salesforce, Excel/Power Query, and cross-system analysis to investigate operational issues, improve data quality, automate recurring processes, and support business decision-making. Background in software development and quality assurance provides a strong foundation in root-cause analysis, anomaly detection, testing, and validating corrective actions.

EXPERIENCE

Specialty Equipment Market Association (SEMA)

Diamond Bar, CA

DATA OPERATIONS COORDINATOR

June 2025 – Present

- Investigates data and operational anomalies across Salesforce and connected systems, using SQL and record-level analysis to form hypotheses, identify root causes, and support corrective action.
- Designed SQL-based monitoring and audit processes with historical logging and severity thresholds to proactively surface data-quality and operational risks; one analysis found that over 25% of member organizations lacked an assigned primary contact.
- Proactively identified data-quality defects in a customer payment-reminder audience before deployment, contributing to the campaign being paused and rebuilt before inaccurate communications were sent.
- Builds and maintains recurring SQL, Salesforce, and Excel/Power Query analyses and automated workflows supporting operational reporting, audience segmentation, data quality, and cross-system reconciliation.

Knights Of Creation

California

SOFTWARE DEVELOPER

2022 – 2025

- Developed SQL and Python tools, ETL workflows, and automation supporting internal operational processes.
- Built data-transfer processes and user-facing applications that reduced manual work and improved process consistency.

MaxGames Studios

Remote

QUALITY ASSURANCE & LIVE OPERATIONS SUPPORT

2017 – 2022

- Performed regression and pre-release testing for live-service updates, reproducing defects, documenting findings, and validating fixes.
 - Investigated unexpected system behavior and data inconsistencies, providing developers with reproducible issues and actionable findings.
-

TECHNICAL SKILLS

- **Data & Reporting:** SQL, Excel, Power Query, SOQL, Data Analysis, Data Validation, ETL
 - **Visualization & Communication:** Power BI, Looker Studio, PowerPoint
 - **Platforms:** Salesforce, iPost Enterprise, Microsoft Access
 - **Development & Automation:** Python, VBA, APIs, Git, AI-assisted SQL development & validation
-

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science

Honors: Cum Laude

Grand Canyon University

Phoenix, AZ

Salesforce Certified Data 360 Consultant

San Francisco, CA
